RepliGo Server 3.3

How can RepliGo Server **complete** your BlackBerry Enterprise Solution?

Complete Your BlackBerry® Enterprise Solution

Highest Fidelity Solution Available

- [Document Rendering](#) - Exclusive rendering technology displays a true view of the document — not an image — and is optimized for wireless delivery.
- [Advanced Navigation](#) - Quickly read text with the convenient Reading View or find information in large documents using search, thumbnails and bookmarks.
- [Native PDF Support](#) - View PDF documents natively on the device with the standalone application, RepliGo Reader — now included with RepliGo Server.

Search and Securely Access Your Network

- [Network Access](#) - Securely access and manage files on network folders, Microsoft Exchange, Microsoft SharePoint, WebDAV and Personal Storage.
- [Search](#) - Quickly search across shared network drives and Microsoft SharePoint to locate files or specific keywords inside documents.

Functionality Beyond BlackBerry® Enterprise Server

- [Network Printing and Bluetooth Printing](#) - Print on-demand to network-based printers and compatible Bluetooth® printers.
- [Offline Document Viewing](#) - Download files to the memory card in their native format, as a PDF, or as a RepliGo document, for fast, efficient viewing and reference.
- [Faxing and Emailing](#) - Fax documents and send email attachments directly from the BlackBerry® smartphone.
- [Precise Administrative Control](#) - Build secure user groups and control access rights while monitoring usage, audit logs and disk space.
